**Task - 7 : Identify and Remove Suspicious Browser Extensions.**

**=> Objective:**
Learn to spot and remove potentially harmful browser extensions**.**

**=> Browser Used**

Google Chrome

**=> Steps Taken**

1. Opened Chrome and visited `chrome://extensions/`.

2. Reviewed all installed extensions manually.

3. Checked extension permissions and verified sources.

4. No suspicious or unnecessary extensions were found.

5. Did not remove any extensions.

6. Restarted browser to confirm normal performance.

**=> Extensions Removed**

None — all installed extensions are safe, from trusted sources, and currently in use.

**=> What I Learned**

● How to inspect browser extensions and their permissions.

● Malicious extensions can:

    ○ Track your activity

    ○ Steal personal data

    ○ Inject ads or redirect webpages

● It's important to regularly review and manage browser extensions.

**=> Conclusion**

No harmful extensions were found. The task improved awareness of how browser add-ons can impact security and how to evaluate them responsibly.
